

# The following to be considered in the evaluation:

1. Approach to a programming assignment, how the offeror found a workable solution and met the requirement?
2. Did the offeror demonstrate the ability to apply operations knowledge (able to deploy, manage, and monitor cloud-based applications)?
3. Did the offeror demonstrate the ability to apply user-centric design and provide good user experience?
4. Did the offeror demonstrate the ability to apply good system design principles, and knowledge of modern software?
5. Did the offeror demonstrate the ability to build robust, testable systems?
6. Did the offeror demonstrate the awareness of application security concerns?
